

Communicate Your Way[®]

**DIAL
711**

The California Speech to Speech Service allows people who have a speech disability to communicate with other people by telephone, at NO COST!*

Just dial 7-1-1 and request STS

Make calls through specially-trained STS Communication Assistants who re-voice your conversation to other callers.

Available 24 hours a day, 7 days a week.

Be independent. Make your own calls! Use this State mandated service to find information, make appointments, conduct your business, or just chat with others.

The Speech to Speech Communication Assistant re-voices for the caller with a speech disability, who may or may not use a speech communication device. The hearing caller speaks directly to the caller with a speech disability.

Deaf and Disabled Telecommunications Program

DIAL 7-1-1 and request STS, or to reach STS directly, call 1-800-854-7784

Dial 7-1-1 and register your 7-1-1 Choice

Your calls are answered more quickly if you register your 7-1-1 Choice. You can select any or all of the following when you register:

- Choose to be connected with the STS service when you dial 7-1-1
- Select your provider (optional)
- Choose your preferred language (English or Spanish)

Set up your call preferences with individual providers

There are many options to personalize your phone calls through STS that will make calls easier. Call Customer Service of the STS provider you currently use, and ask for options to customize your calls.

For current STS provider contact information, please visit www.ddtp.org/california_relay_service/ or call 1-866-409-0178 (toll-free).

*Please note that long distance charges apply to all non-local calls.
